NIKA Sterile Finger dressing

For covering and protecting finger wounds

Sterile and ready-to-use

NIKA Sterile Finger Dressing is a ready-to-use, padded sterile dressing for the care of finger wounds. The dressing can be applied directly, without the need for an additional wound covering.

Applications

This finger dressing is primarily used for the care of finger wounds, but can also be used to secure dressings and apply compression to help reduce swelling and provide joint support.
